Robert

Hello, my name is Robert and I am here to assist you today. While I review your case details, would you mind sharing your preferred name?

11:39 AM

Hi Robert, I am stuck and have been stuck for the past few weeks.

Call me Gary

11:39 AM

Hello Gary

what issue are you having?

11:39 AM

Getting this error for launching new instances as well as restarting existing instances
Instance launch failed
This account is currently blocked and not recognized as a valid account. Please contact
<https://support.console.aws.amazon.com/support/home?region=us-east-1#/case/create?issueType=customer-service&serviceCode=account-management&categoryCode=account-verification> if you have questions.

Failed to start the instance i-09883a010a52509f6

AMI = i-09883a010a52509f6

11:39 AM

Got it, this happened because there are still restrictions on your account

11:40 AM

We cleaned up our account

11:40 AM

because we have not continued with the process as we did not get your response on April 20

asking you some questions

11:40 AM

Ok sure.

11:40 AM

This were the questions:

1. Which location (country or city) are you accessing the account from? (Please add VPN locations if used)
2. Does anyone other than you have access to the account? For example, an IT developer?
3. Where is that person accessing the account from?

11:40 AM

So there are two of us who access the account. I am the more active one. I am right now in San Francisco but I move around alot.

The other is Wayne, he rarely comes into the account, I think if I dont remember wrongly he is mostly based in Texas

Jake who finances the account doesnt come in at all.

I dont use any VPN

11:41 AM

Great, so the only login location authorized is in the USA?

11:42 AM

Mostly unless if I am in Brazil or Asia or Europe. I move around alot

Right now for this two months I am in San Francisco. In July I will be China and then in August in Brazil

11:43 AM

Got it, I need you to be very specific with at least the locations from the past 6 months

11:43 AM

Sure.

Right now San Frnacisco
Before I was in LA
Before that in Rochester New York
Before that in New ORleans
Before that in Austin Texas
Before that in LA
BEfore that in Bali INdonesia
Before that in Singapore
Before that in LA
BEfore that in Arizona area

11:44 AM

Great thanks!

Now I just need some confirmations from you

11:45 AM

Ok

11:45 AM

I noticed a spike on your bills related to EC2 on April, this was not authorized by you?

11:46 AM

It was not authorized by me

there was a hack. I think Wayne probably leaked the SECRET KEY On his end. I came in and cleaned everything up after that

11:46 AM

Got it, you only use EC2 in 3 regions correct? North Virginia, N. California and Singapore

11:47 AM

Yes. Correct.

I even filled a full report of the clean up

11:47 AM

Perfect, allow me moment to double check just to make sure there is nothing outside those regions

(To avoid any delays from the Service team)

11:48 AM

ok. will wait

11:48 AM

Perfect thank you for waiting

11:51 AM

Am here

11:51 AM

I see EC2 resources but none recently created :D

11:51 AM

Wonderful

11:51 AM

Now moving forward are the following IAM Users authorized by you?

truesight_dao_autopilot
database_backup

11:51 AM

yes. They are

11:51 AM

Great! What about the IAM Roles:
AWSServiceRoleForSSO
AWSReservedSSO_AdministratorAccess_ab752baaa9a0c7c1

11:52 AM

those are me

I started separating different roles for different purposes

11:52 AM

Perfect thank you! I will contact now the Service team to confirm all measures have been taken and to remove the restrictions placed on your account

Once completed I will let you know via email

11:53 AM

Ok. Thank you

11:55 AM
